3 Least travelled countries

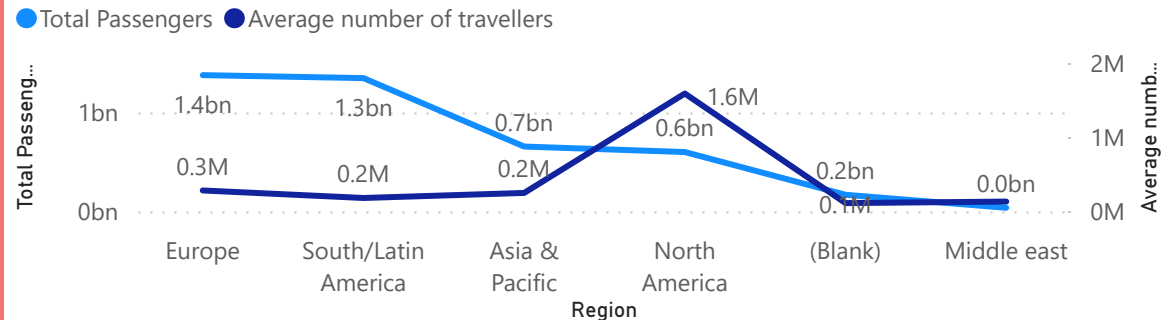

- Canada has the highest volume of travellers and it's in the North Region this could be as a result of it's close proximity to USA.
- Favourite region is the South/Latin America while Middle-East is the least visited region Africa seems to be a no-no as no country was recorded for that region.
- People travelled more during winter more than any other season this could be as a result of the Christmas and New Year Holidays.
